

START YOUR ENGINES!

As a small company, FBC Chemical Corporation has a long history of supporting small users of methanol, sodium hydroxide and potassium hydroxide.

Whether you're a biodiesel manufacturer in need of chemicals to produce fuel, or a motorsports aficionado in need of methanol to power your vehicle, FBC has a program in place meant especially for small quantity consumers like you.

Contact us now to learn how to easily acquire the chemicals you need.

FREQUENTLY ASKED QUESTIONS

HOW MUCH DO YOUR PRODUCTS COST?

Much like gasoline prices, chemical prices are always changing, thus we can not accurately publish a price. If you would like an up to date quote, contact the sales rep in your area. Pricing gets better with higher volume purchases.

WHAT IS THE MINIMUM ORDER SIZE?

For potassium hydroxide and sodium hydroxide (caustic potash and caustic soda, respectively), the minimum container size is a 50 lb. bag. The smallest amount of methanol you can buy is a 55-gallon drum.

HOW DO I KNOW I'M BUYING QUALITY, HIGH-PURITY CHEMICALS?

Our employees are trained to deal with only the highest quality products. If ever a truckload of product arrives and it does not meet our stringent specifications, we tell the truck's driver to turn around and take it back. FBC will provide you, our customer, a chemical assay showing you exactly how pure your product is, as well as its acceptable specs.

DOES FBC DELIVER? HOW MUCH DOES DELIVERY COST?

Yes, we deliver to most regions in Ohio, West Virginia, Pennsylvania and New York.

We charge a flat fee of \$15 to deliver four or more drums and \$30 to deliver fewer than 4 drums of product.

If you live outside of our normal delivery areas, we can still ship to you, but additional freight charges will apply.

Picking up the material is also an option. If you are near one of our warehouses in Medina, OH, Mars, PA or Lancaster, NY, we can load the material directly into your vehicle.

WHAT SPECIAL PERMITS DO I NEED TO TRANSPORT THESE CHEMICALS?

The DOT considers methanol, caustic soda and caustic potash to be hazardous materials. By law, you are permitted to transport up to 1,000 lbs. of hazardous materials without a Haz Mat license or a placard on your vehicle.

HOW DO I PAY FOR MY ORDER?

When you purchase chemicals from FBC, you may pay with cash, check, money order or a major credit card.
